PROFILE

Reliable, loyal, and determined. Student of the garden, builder of apps, solver of puzzles, reader of stories, asker of questions, lover of music.

PROJECTS

Readz - C#/.NET
A desire for a location to read and share book reviews with other bibliophiles led to the creation of Readz.

- An MVC application that enables a user view and share book reviews with other users.
- Final Back-End Capstone project built with C#/.NET as an MVC project utilizing the GoogleBooks API, as well as SQL Server for persistent storage, and CSS/Bootstrap for styling.

https://github.com/hcrudge/NSS-Readz

Fresh Tomatoes - React
Frustrated with available list apps and their lack of features for keeping track of my friends movie recommendations led to the creation of Fresh Tomatoes.

- A single-page application that enables a user to keep track of a users list of movies recommended by friends, as well as their ratings of these movies once they had watched them.
- Mid-Term Front-End Capstone project built with ReactJS utilizing The Movie Database API, as well as JSON server for persistent storage, and CSS/Bulma for styling.

PROFESSIONAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL (NSS), Nashville, TN
Focused six-month (full-time) software development bootcamp with immersive, virtual lab-based learning in HTML5, CSS3, JavaScript, React, SQL, C#, and .NET.

Full-Stack Software Developer   May 2021 – November 2021
- Creates browser-based, full-stack applications with a focus on modern HTML, CSS/Bulma/Bootstrap, JavaScript, React, SQL Server, and C#/.NET features and modular code in individual and virtual teamwork settings.
- Continuously utilizes Git and GitHub for source code version control and collaboration.
- Completes database planning by building entity relationship diagrams to define relationships with an emphasis on maintaining a flat data structure.
- Nominated by classmates to win the "Thoughtful Friend" award.

Group Projects:

Social Buzz - React.   *Link to Social Buzz GitHub Repository*
- Worked with three classmates to create web application built with the ReactJS library with CRUD functionality utilizing the OpenWeather API and JSON server for persistent data storage. The app allows a user to organize daily tasks, events, news articles, and interact with other users/friends via the chat functionality
- Implemented the news articles component by which each user is able to list news articles on his/her articles page with the option to modify or remove their own articles. Friends articles appear in different styling.

Tabloid - C#/.NET MVC   *Link to Tabloid MVC GitHub Repository*
- Worked with three classmates to create a working web application with CRUD functionality utilizing SQL Server for persistent data storage. The app allows a user to share blog posts with other users. Each blog can include a category, as well as multiple comments, tags and reactions. Users can also subscribe to other users posts.
- Implemented the Categories component (including full CRUD functionality) by which each user is able categorize their blog post. In addition, created the UserProfile component where all users can be viewed (either by active or deactivated status), and a users profile type can be updated (as an author or admin), or the profile deactivated/reactivated.

CERTIFICATION

CPA - Tennessee Board of Accountancy

EDUCATION

NASHVILLE SOFTWARE SCHOOL
